- Enhanced Customer Satisfaction

NPS TOOLS

- Hotline Orderable
- Master Sizing Sheet
- Marketing Materials

"I have worked with NPS on several retail and hospitality opportunities. On numerous occasions NPS has provided power protection recommendations such as UPS's that are compatible with NCR's POS solutions, as well as cabling and installation quotes.

I have found that NPS provides a valuable, complete service offering for me and my customer. Their turn-around time has proven to be efficient and effective in our engagements with the customer, and I look forward to engaging them on every account if possible."

NCR Account Manager

POWER PROGRAMS

Today's power protection market has become one that is driven by price, NPS holds strong relationships with manufacturers of UPS products, which allows us to get NCR and its customers the best product at the best price. These relationships also give us the ability to work with manufacturers to modify existing products so as to meet custom needs (power, radiation, emissions, etc.).

NPS has a long-standing relationship with UPS manufacturers, which allows us to react quickly, be competitive on price, and modify products when needed. NPS will recommend products only if they prove to be the best fit for NCR's customer. Our goal is first and foremost to give NCR the solution that best meets their customer's needs.

Self Service ATM / Fastlane / Kiosks

IT Services
